Market We Serve

- Asia Pacific
- Central Asia
- Middle East & North Africa (MENA)
- Europe
- Sub-Saharan Africa
- South America

We stand as a dynamic force in the industry, serving diverse markets with extensive product offering and portfolio.

About Our Company

FGV IFFCO (formerly known as FELDA IFFCO) represents a joint venture between FGV Holdings Berhad, a prominent force in Malaysia's agri-business sector, and IFFCO Group, a major player in the FMCG and industrial food products in the Middle East with operations in 49 countries around the world. This joint venture synergizes FGV's extensive experience in plantation and agri-business with IFFCO's prowess in manufacturing and marketing, creating a formidable entity in the global oils and fats market. The collaboration aims to leverage the strengths of both companies to meet the increasing global demand for vegetable-based oils and fats such as palm, palm kernel, sunflower, soya and coconut by ensuring a steady supply chain and innovative product offerings

Our Capabilities & Facilities

FGV IFFCO's commitment to quality and food safety is evident in their stringent processing of palm, palm kernel, coconut and soft oils.

- Refining (Physical and chemical) and Fractionation
- Hydrogenation and Enzymatic Interesterification
- Packing (Oils and Fats)
- Distribution and Bulking Storage

Quality Assurance

Since its inception in year 2006, FGV IFFCO has built a solid reputation for quality and in doing so has achieved several awards and certifications:

“

The collaboration aims to leverage the strengths of both companies to meet the increasing global demand for vegetable-based oils and fats

”

Specialty Fats

Moulding Fat

- | Non-tempering fats with 5% tolerance to cocoa butter
- | Moulded compound chocolate and coating
- | Fat bloom resistance, good mould release and imparts glossiness

- PSCO 32
- PSCO 7
- CBS ACTIV 01
- PKCBS HR100
- PKCBS Range
- PK CBS

Coating Fat

- | Coating biscuit and sweet confectionaries.
- | Enrobing fats.

- PKCBS Range
- SCO 38
- SCO 39

- | Ice cream coating fat.
- | Steep melting profile and firm coat.

- ICMP 28

- | Interesterified fat with low trans fat content
- | Non tempered.
- | Fat for coating porous product like sponge cake.
- | Fat for compound chocolate and coating

- SCO NH100
- CF NH38
- SCO 35 T Range

Specialty Fats

Cream Fats & Filling

- | Filling in between biscuit and wafer.
- | Toffee and whipping cream applications.

- SCO Range
- ICMP Range

- | Good adherence, firmness and even distribution.
- | Cream filling in between sandwich biscuits.

- CRF 38
- PLHS 37

- | Interesterified fat with low trans fat content.
- | Filling in between wafer with excellent creaming consistency.

- CRF 31M
- CRF 20
- CRF 33

Specialty Oils

Spread Fats

- Optimal plasticity, excellent spreadability at low temperatures, and a stable structure.
- Stability to oil migration.
- Good melting profile and flavour release.
- Excellent tolerance to nut paste and chocolate spread.

- C SPR RG
- C SPR HR
- CFF 100
- CFF TS Range
- CFF 24

Bake stable filling

- For pastries and filled baked goods
- Smooth, creamy fillings that stay intact even after baking

- Chocodelight
- C SPR Range
- CFF TS Range

Specialty Oils

Low 3MCPD and GE

Suitable for infant milk application

- RBD Palm Oil
- RBD Palm Stearin
- RBD Palm Olein
 - CP10
 - CP8
 - CP6
 - CP5

Low FFA

High stability frying oil with good oxidative stability.

- RBD Palm Olein CP10

Soft Seed Oil

For salad dressing, canning purpose, cooking.

- RBD SBO
- RBD SFO

Blended vegetable oil with a combination of soft seed oil and palm to give a unique product.

Cost saving purposes.

- BVO

Bakery Fats/Margarine

Shortening

All purpose shortening for frying, cream filling and baking.

- HQPO Range

Fats for baked bread goods.

Improve stability and bread crumbs softness.

- BRF Range

Cream filling in between sandwich, cookie and cake.

Good creaming properties.

- BSFN/S

High performance biscuit dough fat.

- BSFN/M

Margarine

Excellent creaming properties for cakes.

Giving good volume and even crumb structure.

All purpose margarine for baking applications.

Butter Oil Substitute & Ghee

Butter Oil Substitute

- | Mimic the properties of the milk fat.
- | Good flavour release.
- | Exhibits good plasticity and flakiness of baked products.

- BOS 34C
- BOS 37
- BOS 3840

Vegetable Ghee (Vanaspati)

Perfect cooking medium and suitable for preparation of confectionaries, sweets and biscuits. Also widely used in various culinary applications including enhance flavors such as in making aromatic briyani, pilaf and arabic desserts like kunafa.

Non Dairy

Non-dairy Creamer

- | Good oxidative stability.
- | Enhance flavour release and steep melting profile.
- | Excellent mouthfeel.

- ICMP 39
- ICMP 40
- ICMP 42
- ICM35

Milk Fat Replacer

- MFR33

Ice Cream Mass/ Fat

- | Replace milk fat in ice cream
- | Good oxidative stability.
- | Excellent flavour release.

- ICM25
- ICM35
- ICMP32LT
- RCO MF45
- FFT45

Heat Resistant Whipped Cream

- | Non dairy whipped cream with better stability
- SCO41

Frying Fats

Frying

Fats for industrial frying

- BRF 4548
- HP FRY 42

Doughnut frying fat

- BSFN/H13
- TFF H41

Cooking Oil

Cooking & Frying

- RBD Palm Olein
- CP10, CP8, CP7, CP6, CP5

Hardstock Fats

Soup Stock/Cube

Good binding and flavour release.
No oiling out in soup stock.

- PHS45M
- NH CF4651 IH

Ingredient for Margarine

As hardstock ingredients for margarine or ghee production.

- PHS 45
- PHS 47
- SHS37

Interesterified fat.

As hardstock ingredients for margarine or ghee production.

- NH 50
- HS47

Spray Fats

Biscuit Spray Fat

Spray fat on surface of cream cracker and biscuit to impart glossiness and prevent moisture retention.

- ICM25
- ICMP24

Non- Food Product

Animal Feed

Ideal ingredients for enhancing the energy profile of animal feed.

- RBDPS PORAM
- RBDPS IV15

Candle

- HPS
- RBDPS

Soap Bar / Detergent

- RBDPS
